

Improving interprofessional communication, improving patient safety

Maria Ford

Consultant Nurse in Critical Care
RGN, MA, PGCHE, BSc (Hons), DPSN

Salisbury NHS Foundation Trust

- Covers a population of 200,000
- 32,000 admissions
- Provides regional specialist services
- Employs 3773 staff
- 560 in-patient beds

Communication - the challenges

- No standardisation or training
- Reduced continuity
- Interprofessional communication
- Clinical environment

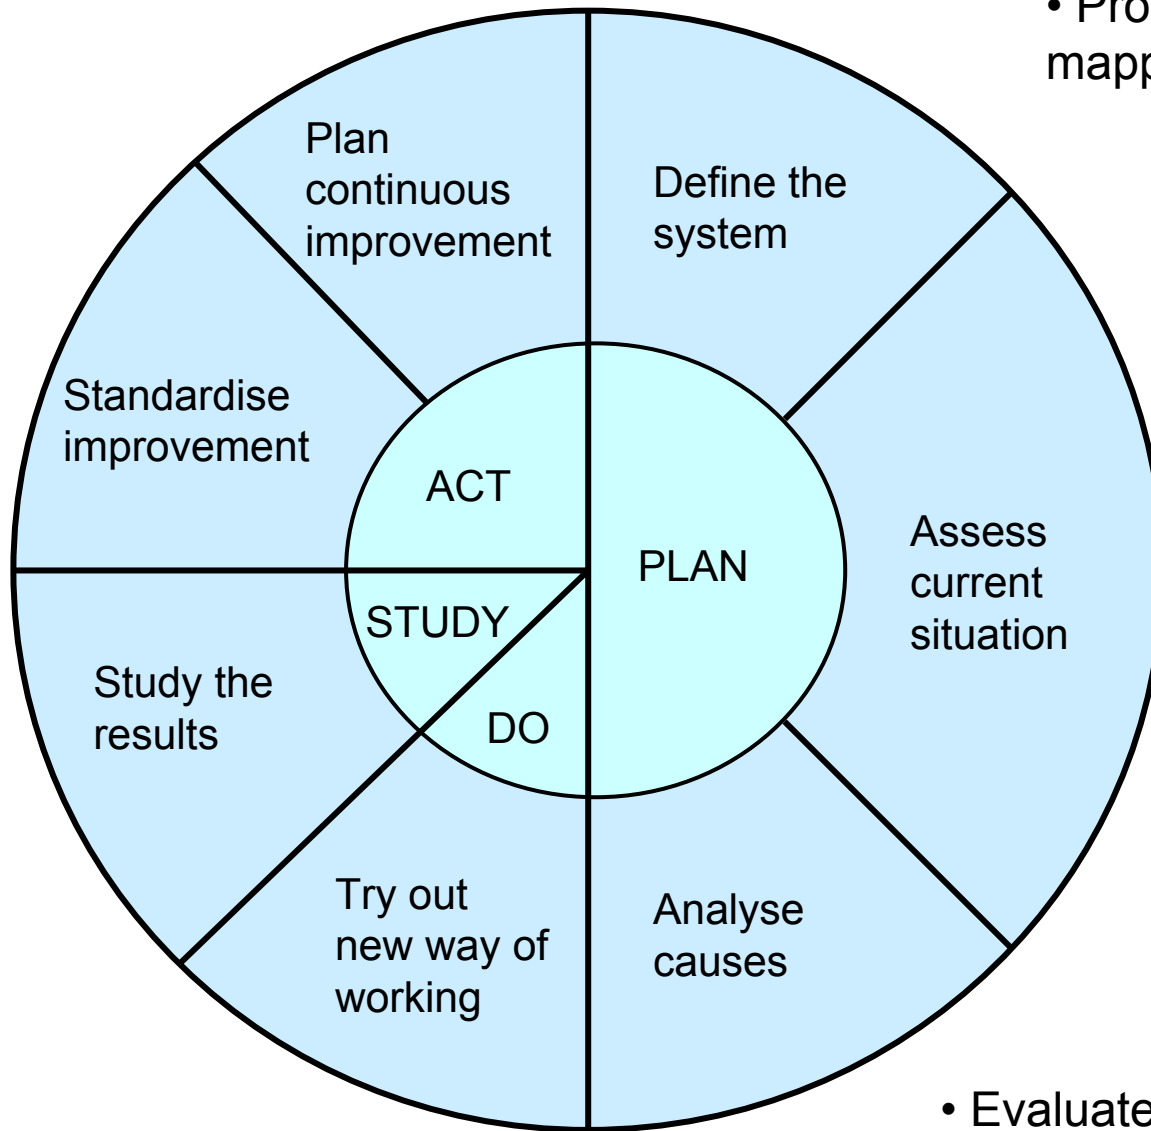

Healthcare Improvement Project

- Improve care and patient safety
- Demonstrate collaborative and interprofessional working
- Encourage the use of evidence based practice
- Outcome evaluation should be measurable
- Personal development

- Process mapping exercise

- Discuss own experience
- Literature search
- Audit current practice

- Evaluate audit results

Project Objectives

- To improve the level of information given in order to prioritise bleep response times
- To ensure timely patient assessments
- To reduce interprofessional conflict
